## Persistent headwinds to impact growth prospects

### Quick Pointers:

- Aims to reach double-digit revenue penetration from exports in FY26
- Discussions underway with multiple clients to convert RFQs into orders

**We cut our estimates by 5-25% over the forecast period to factor in the headwinds in the legacy transfer case business and slowdown in the EV business. Further, we downgrade our rating from "HOLD" to "REDUCE" with a TP of Rs408 (previous Rs637), valuing it at a P/E of 30x on its Dec'26 EPS. Divgi Torqtransfer Systems (DIVGIIT) reported 7th consecutive quarter of de-growth in revenue, indicating persistent challenges across core and new business segments. Its Q3FY25 revenue declined by 16.5% YoY, against the anticipated de-growth of 8%/11% (PLe/BBGe). Gross profit declined by 5% YoY, but gross margin expanded by 776bps YoY to 62.7% (PLe: 50.8%). EBITDA declined by 33.3% YoY, while margin contracted by 407bps YoY to 16.4% (PLe: 18.5%; BBGe: 18.4%), impacted by sharp rise in staff and other expenses. Weak overall performance led its PAT to decline by 44.1% YoY. The company has outlined a strategy to expand its product portfolio as well as diversify its revenue streams through components and exports businesses. However, we believe increased competition for a key customer in the EV space and low 4W drive penetration shall continue to impact its growth. Downgrade to "REDUCE."**

- **Revenue decline across segments led to miss on estimates:** Q3FY25 revenue came in at Rs525mn (PLe: Rs579mn; BBGe: Rs564mn), impacted by lower sales in EV transmission and transfer case segments. Gross profit was Rs329mn (PLe: Rs330mn), and margin expanded by 776bps YoY to 62.7% (PLe: 56%), aided by better realization. EBITDA was Rs86mn (PLe: Rs107mn; BBGe: Rs110mn), while margin contracted by 407bps YoY to 16.4% (PLe: 18.5%; BBGe: 18.4%), impacted by higher royalty towards BorgWarner and rise in employee expenses. Persistent headwinds impacted DIVGIIT's profitability, as PAT came in at Rs52mn (PLe: Rs81mn; BBGe: Rs80mn).
- **Weak performance in core and EV businesses:** Revenue from the transfer case business dropped 38.5% YoY to Rs240mn, impacted by low volume from key customers towards the 4W drive business. Slowdown in the EV industry and increased competition for a key client led the E-gear drive revenue to decline by 20% YoY to Rs40mn. Components revenue increased 27.3% YoY to Rs140mn, driven by strong orders from domestic and international clients.
- **Key concall highlights:** 1) Plans on to expand transfer case business internationally in Japan, Korea and US, and introduce new variants in the domestic market. 2) EV transmission sales below expectations due to slowdown in customer adoption; new long-range models for M&M and Tata Motors to drive volume growth in the upcoming period. 3) New opportunities in the US aftermarket to strengthen revenue streams. 4) Per unit realization on the transfer case is significantly better due to better sales in defense. 5) Discussions underway with multiple clients to further strengthen its order book and diversify its revenue stream. 5) Production approvals received for exports products, which have a potential of generating ~Rs70mn revenue monthly.
